HKU Earth Sciences Public Talk & Museum Guided Tour

Event Time: 1:00 pm- 3:00 pm, Saturday, 7th December, 2024

Event Address: Stephen Hui Geological Museum, HKU

Title: Everything you need to know about the dinosaur world

During the Mesozoic era, dinosaurs roamed the land while marine reptiles thrived in the oceans. The Earth's surface looked very different during this time, as the continents were arranged differently than they are today, and the types of plants were significantly different from those we see now. In this talk, you will learn everything you need to know about the Mesozoic world. We invite secondary school students and their parents to bring their curiosity as we explore this unique period together!

Speaker: Prof. Su-Chin Chang is a geologist specializing in determining high-resolution ages for significant evolutionary events. Over the past 25 years, her research has enhanced our understanding of the oldest flowers, the evolution of various dinosaurs, and the transition from dinosaurs to birds.
