Master of Science in the field of APPLIED GEOSCIENCES

A springboard for a robust and fruitful career

2024-25 (September 2024 intake)
Aim: to help engineering geologists improve their performance in professional work. Engineers and scientists wanting to advance their understanding of geology and geotechnics are also invited to apply.

Two themes are accredited by the Geological Society of London
• Engineering Geology Theme*
• Engineering Geology with HKIE Approved Courses Theme*

*Applications for Chartered Geologist or Scientist (CGeol/CSci) with an accredited MSc benefit from an accelerated route, subject to satisfying all other criteria.

Top-notch Scientists in the Faculty

Clarivate Analytics’ Essential Science Indicators:
18.3% of our professoriate staff (average over the past decade) are classified Top 1% scholars

Engineering Geology Theme

Focus
◇ Application of geology and mechanics in geotechnical practice
◇ Development of professional skills

General Applied Geosciences Theme

Focus
◇ Geology and geotechnics for scientists, including geospatial professionals

Engineering Geology with HKIE Approved Courses Theme

Coverage
◇ Offers all 14 of the additional courses which graduates in Earth Sciences or Geology would need to meet the entry requirements of the Hong Kong Institution of Engineers in the Geotechnical Discipline
◇ Such graduates must have studied not less than 50% of the degree curriculum on geology and related subjects but not including applied subjects

Tuition fees
Composition fee: HK$165,000* (subject to approval)
Students are required to pay Caution Money (HK$350, refundable on graduation subject to no claims being made) and Graduation Fee (HK$350). All full-time students will be charged a student activity fee of $100 per annum to provide support for activities of student societies and campus-wide student events.

Programme duration
Full-time: 1 year  Part-time: 2 years

Study load
Credits: 66 / 69 credits
Learning hours: 1,440 or 1,500 hours
(including 360 hours for the project and contact hours of 400 / 415 hours)
Remarks: The 2-year programme imposes a heavy workload on a part-time student in a full-time job

Class schedule
• Teaching: mainly on weekday evenings
• Students are expected to study until 31 August and teaching is also conducted during Reading Weeks and Summer Semester
• Field and laboratory work: weekends

Medium of instruction
English

Assessment
Mostly coursework and written examination

#The fee shall generally be payable in 2 instalments over 1 year for full-time and 4 instalments over 2 years for part-time
Where will this Programme Lead You

Who should Take this Programme

Professional recognition
- The two Engineering Geology themes are accredited by the Geological Society of London which awards the qualification Chartered Geologist
- Candidates with an accredited MSc can apply for Chartered Geologist with fewer years of working experience
- The courses of the Engineering Geology with HKIE Approved Courses Theme are approved by the HKIE

Network and transferable skills
- The chance to learn from top professors and leading practitioners from industry
- Technical knowledge and professional skills you can apply anywhere
- A valuable network of industry connections; career advice and inspiration

Career development
Employers of recent MSc graduates include: AECOM, Airport Authority, Arup, Arcadis, Atkins, CMWA, Dragages, Fugro, Gammon, Geotechnical Engineering Office, Jacobs, MTRC, Meinhardt, Vibro and WSP

Scholarships and financial support
- Association of Geotechnical and Geoenvironmental Specialists (Hong Kong) Scholarship
  - This $10,000 scholarship is awarded annually on a merit basis
- Government’s Extended Non-means Tested Loan Scheme (for local students only)
- Taufik Ali Memorial Scholarships for Postgraduate Studies
  - Persons of the Muslim faith born in Hong Kong or Penang are eligible to apply
  - The scholarship may cover tuition fees and living allowance on a case-by-case basis
  - Please contact Programme Admissions Advisor Professor Malone for details
  - For more details: [https://www.scholarships.hku.hk/Scholarships/detail/256](https://www.scholarships.hku.hk/Scholarships/detail/256)

Prizes
Halcrow Prizes are awarded to the Best Student and for the Best Dissertation

Courses reimbursable by the Continuing Education Fund (CEF)
- GEOS7012 Site investigation and engineering geological techniques
- GEOS8101 Engineering geology and geotechnical design
- GEOS8102 Rock engineering and geomaterials

The mother programme (Master of Science in the field of Applied Geosciences) of these courses is recognised under the Qualification Framework (QF Level 6)

Host

Department of Earth Sciences

Founded in 1995, we initially focused on the geology of Asia and the Asia Pacific Regions, but now our scholars carry out cutting-edge research and science of societal relevance across a range of earth and planetary sciences.

Our work on applied geosciences is carried out in the real world laboratory of Hong Kong and the region.

Hear from our graduate

Olivia LAM (Class of 2017) is working as a Senior Business Analyst for the Group Director Development & Digital Transformation at Fugro NV in the Netherlands. Her job supports the company’s mid-term strategic implementation.

WHAT YOU WILL LEARN

Programme Structure

Engineering Geology theme (66 credits)

Core courses
- GEOS7010 Geology principles and practice (6 credits)
- OR
- GEOS7011 Advanced geology of Hong Kong (6 credits)
- GEOS7033 Geology of Hong Kong (6 credits)
- GEOS7012 Site investigation and engineering geological techniques (6 credits)
- GEOS7015 Rock mechanics (3 credits)
- GEOS7016 Soil mechanics (3 credits)
- GEOS7020 Project part I (6 credits)
- GEOS7021 Geological fieldwork I (3 credits)
- OR
- GEOS8021 Geological fieldwork II (3 credits)
- GEOS8001 Hydrogeology (3 credits)
- GEOS8002 Professional practice in applied geosciences (3 credits)
- GEOS8003 Seminars on unforeseen ground conditions, geotechnical and environmental failures (3 credits)
- GEOS8020 Project part II (12 credits)
- GEOS8101 Engineering geology and geotechnical design (6 credits)
- GEOS8102 Rock engineering and applications (6 credits)
- GEOS8104 Natural hillside landslide and hazard studies (3 credits)
- GEOS8204 Basic structural mechanics and behaviour (3 credits)

Elective courses
- GEOS7022 Course of directed studies (3 credits)
- GEOS7036 Innovative technology and environmental sustainability (3 credits)

Core courses for students with a first degree in Geology or a related subject: GEOS7011, 7012, 7015, 7016, 7020, 8001, 8002, 8003, 8020, 8021, 8101, 8102, 8104, 8204 – 66 credits. GEOS7022 may be substituted for GEOS8204 if directed by the Programme Director.

Core courses for students whose first degree is not in Geology or a related subject: GEOS7010, 7012, 7015, 7016, 7020, 7021, 7033, 8001, 8002, 8003, 8020, 8101, 8102 – 66 credits.

Engineering Geology with HKIE Approved Course Theme (69 credits)

Core courses
- GEOS7012 Site investigation and engineering geological techniques (6 credits)
- GEOS7015 Rock mechanics (3 credits)
- GEOS7016 Soil mechanics (3 credits)
- GEOS7020 Project part I (6 credits)
- GEOS7024 Management (3 credits)
- GEOS8001 Hydrogeology (3 credits)
- GEOS8002 Professional practice in applied geosciences (3 credits)
- GEOS8003 Seminars on unforeseen ground conditions, geotechnical and environmental failures (3 credits)
- GEOS8020 Project part II (12 credits)
- GEOS8101 Engineering geology and geotechnical design (6 credits)
- GEOS8102 Rock engineering and applications (6 credits)
- GEOS8204 Basic structural mechanics and behaviour (3 credits)
- GEOS8205 Mathematics I (6 credits)
- GEOS8206 Mathematics II (6 credits)

Elective course
- GEOS7036 Innovative technology and environmental sustainability (3 credits)
General Applied Geosciences theme (66 credits)

For full-time students (non-geologists)

Core courses

GEOS7010 Geology principles and practice (6 credits)
GEOS7033 Geology of Hong Kong (6 credits)
GEOS7012 Site investigation and engineering geological techniques (6 credits)
GEOS7015 Rock mechanics (3 credits)
GEOS7016 Soil mechanics (3 credits)
GEOS7020 Project part I (6 credits)
GEOS7021 Geological fieldwork I (3 credits)
GEOS7024 Management (3 credits)
GEOS7035 Intermediate geology (6 credits)
GEOS7036 Innovative technology and environmental sustainability (3 credits)
GEOS8001 Hydrogeology (3 credits)
GEOS8002 Professional practice in applied geosciences (3 credits)
GEOS8003 Seminars on unforeseen ground conditions, geotechnical and environmental failures (3 credits)
GEOS8020 Project part II (12 credits)

Remarks:
1. Certain courses may be accepted as electives at the discretion of the Programme Director
2. The programme structure will be reviewed from time to time and is subject to change
3. To be eligible for the award of the MSc in the field of Applied Geosciences, a student shall complete all core courses and total credits prescribed in a selected theme

*For students whose first degree is not in Geology or a related subject
*For students with a first degree in Geology or a related subject
*As directed by the Programme Director
The fieldwork may be undertaken in association with the excursions of the Department of Earth Sciences, the local learned societies or independently.

**GEOS7022 Course of directed studies**
Studies to assist learning in the core courses, involving some of the following activities: professional activities, field work, laboratory work, internship, class exercises, tutorials and reading.

**GEOS7024 Management**
This course introduces the basic knowledge of project management practice. It will cover the following topics: engineering processes, programming and procurement strategies; contract management; construction site safety, health and environmental aspects; quality control and quality assurance.

**GEOS7033 Geology of Hong Kong**
To provide an understanding of the principal components of the geology of Hong Kong and its regional setting, including the distribution and interpretation of the main rock types, age relationships; and superficial deposits; and the locations and orientations of the main regional and local structures.

**GEOS7035 Intermediate geology**
The course introduces mineralogy, petrology and structural geology for non-geologists who have passed the prerequisite course GEOS7010.

**GEOS7036 Innovative technology and environmental sustainability**
The course introduces the government policy on the adoption of digital technology and sustainability assessment in public works projects, and provides an understanding of the role of innovative technology and environmental sustainability in engineering practice through case histories and examples.

**GEOS8001 Hydrogeology**
To study the role of sub-surface water in engineering and environmental applications. Topics include the hydrologic cycle, properties of aquifers controlling the transmissivity storage and quality of groundwater, quantification of groundwater flow, the field investigation of groundwater and assessment of field parameters and applications of hydrogeology in engineering and environmental studies.

**GEOS8002 Professional practice in applied geosciences**
An examination of issues in professional practice in applied geosciences; including regulation of practice, professional ethics and law, contracts and risk management.
GEOS8003 Seminars on unforeseen ground conditions, geotechnical and environmental failures
A series of student-led seminars on case histories of landslides, collapses of engineering structures, excessive ground settlement and environmental disasters. Presentations of facts and opinions are given by students based on suggested reading material. This course provides a capstone experience.

GEOS8020 Project part II
The second phase of an independent study of a problem in applied geosciences culminating in the preparation of a project report of about 10,000 words. Students will be required to make a presentation of their preliminary results. This course provides a capstone experience.

GEOS8021 Geological fieldwork II
Self-directed study in the field over a 6-month period leading to the production of maps, field sheets, narrative accounts and other geological records for assessment. The fieldwork may be undertaken in association with the excursions of the Department of Earth Sciences, the local learned societies or independently.

GEOS8101 Engineering geology and geotechnical design
An examination of civil engineering design methodology and the application of soil mechanics theory and empiricism in geotechnical design. Emphasis is given to soil slopes and embankments, earth pressure and retaining structures; and shallow and deep foundations.

GEOS8102 Rock engineering and applications
This course starts with a brief introduction to the design methodology and the systems approach in rock engineering, and is mainly focused on the collection and analyses of engineering geological data for the design of rock structures. Uses of rock mechanics input and empirical classifications in analysis and design of rock slopes, tunnel excavation and support systems, and rock foundations are demonstrated through case histories.

GEOS8104 Natural hillside landslide and hazard studies
The contents of this course will include most of the following topics: classification of landslides; Hong Kong terminology, examples of natural terrain landslides and documentary sources of information; hillslope evolution, geomorphological principles (including the evolutionary landform models of Dalrymple and Hansen) and Quaternary geology of Hong Kong; hillslope hydrology, modes of groundwater flow, runoff and infiltration, piping; hydrological and morphological conditions for initiation of shallow landslides in regolith; engineering geological and geomorphological mapping; landform processes; regolith mapping, boulder identification; landslide hazard assessment; landslide susceptibility assessment for risk quantification; design event approach; landslide mobility modelling.

GEOS8204 Basic structural mechanics and behaviour
The course covers most of the following topics: Behaviour of structural members subjected to tension, compression, bending, shear and torsion. Buckling of compression members. Statically determinate and indeterminate structures; including the concept of redundancy of structural members. Load transfer mechanisms of structural systems including foundations and shoring systems. General behaviour and basic concepts in design of reinforced concrete members. Structural design of foundations and retaining walls.

GEOS8205 Mathematics I
This course (together with GEOS8206 Mathematics II) strives to provide a comprehensive introduction to the fundamental mathematics that all earth scientists need. Topics include the language of sets, the concept of matrices and its applications, functions, limits, first order differentiation, applications of derivatives, first order Taylor’s expansion, properties of exponential and logarithmic functions, the notation of integration, integration techniques, volume of revolution, higher order differentiation and Taylor’s expansion, Hessian test for functions of two variables, the concept of multiple integration, and volume using triple integration.

GEOS8206 Mathematics II
This course is a continuation of GEOS8205 (Mathematics I). The first part of the course aims to teach students different solution methods to first order differential equations (separable, linear, Bernoulli, exact/non-exact types), second order linear differential equations with constant coefficients using characteristic equation, method of variation of parameters, method of educated guess. The second part introduces the concept of probability and statistics, topics include counting, probability (using the language of sets), random variables (including Binomial, Poisson, Exponential, Normal), probability density/distribution functions, cumulative distribution functions, joint distributions, independence, mean, variance, covariance, moment generating functions, sampling and confidence intervals (using Normal/t- distributions).
We design the courses to strike a balance between basic scientific principles, applications and intellectual developments. Teaching is conducted by top professors and leading practitioners from industry. This is an MSc programme to prepare students for a robust and fruitful career.

Programme Director

Professor Louis N Y WONG
BSc HKU; PhD MIT; FGS

Associate Programme Director

Professor W K PUN
BBS; BSc HKU; MSc Lond; DIC; FHKIE

Programme Admissions Advisor

Professor Andrew W MALONE
BBS; BSc Leeds; PhD Lond; DIC; FGS; FICE

Staff list

Dr Haz M C CHEUNG
BSc(Hons), MSc UTA; PhD HKU

Professor J J JIAO
BEng, MEng CUG; PhD Birmingham

Dr F L TSANG
BSc HKU, MSc Sydney, PhD RUG
Part-time Lecturers

Professor P W K CHUNG  
BSc HKU; MSc Lond; DIC; CEng; FHKIE; FGS

Mr J HART  
BSc Edin; MSc Lond; C Geol; GeoRisk Solutions Ltd

Professor K K S HO  
BSc(Eng), ACGi, MSc, DIC; FICE, FHKIE, CEng, RPE(geotechnical), RPE(Civil); Eurling; EEB

Ir I M L HO  
BEng, MPhil HKUST; MHKIE; MICE; CEng; GEO

Professor B P HOY  
LLB; Solicitor Hong Kong, Robertsons

Ir T H H HUI  
BEng HKU; MSc Lond, DIC; MHKIE; GEO

Ir K C HUNG  
BEng, MSc HKUST; LLB Lond; MHKIE; MIstructE, MIOM3, CEng; GEO

Ms Rita S W HUNG  
BBA(Law), LLB, PCLL HKU; Solicitor Hong Kong; Clyde & Co

Ir Florence W Y KO  
BEng HKUST; LLB Lond; MSc Lond, DIC; MA HKCityU; MICE; MHKIE; CEng; GEO

Dr Vickie W W KONG  
BEng, MEng Auckland; PhD UWA; MICE; MHKIE; CEng; GEO

Ir P C T KWOK  
MSc HKU; MHKIE; RSE; Fugro

Ms Trudy H J KWONG  
BSc, MPhil HKU; FGS; BMI

Ir S MILLIS  
BSc Staff; MSc Leeds; CGeol; CEng; MIIMMM; MHKIE; CCBM; RPE; FGS; Arup

Dr S W P NG  
BSc; MPhil HKU; DPhil Oxon; FGS; CEP®; SEG; Minersoc; ASA Tiles HK; CUHK

Dr P L NG  
BEng, PhD HKU; MBA; MHKIE; MICE; CEng; RPE; HKUST

Professor R J SEWELL  
BSc, PhD Cant; FGS; CGeol; CSci; Eur. Geol; AGU

Ir K STYLES  
BSc UNSW; CGeol.FGS; FIMMM; CEng; FHKIE; RPE(GEL) Meinhardt

Mr A C T SO  
BSc Aberdeen, MSc PolyU; MPhil HKU; CGeol; MIOM3, FGS, FGA, FHKICA, DEVB

Dr Tammy P Y TAM  
BSc, PhD HKU; CUHK

Dr Denise L K TANG  
BSc, MPhil HKU; PhD Wellington; GEO

Mr M I WALLACE  
BSc Glasgow; MSc Durham; CGeol; Arup
Admissions

Requirements
Applicants should fulfil the University Entrance Requirements and should possess a Bachelor’s degree with First or Second Class Honours (or GPA equivalent) in Science, Engineering or a related subject.

How to apply
Application opens in September 2023
Applications are considered continuously, and early application is advantageous.
Application Deadlines (Local and Non-local students):
Round 1: 12:00 noon (GMT +8), January 31, 2024
Round 2: 12:00 noon (GMT +8), April 30, 2024

Expected degree conferment will take place in
Full-time: November / December 2025 (Winter Congregation)
Part-time: November / December 2026 (Winter Congregation)
