

Grade Descriptors MSc in Applied Geosciences

The following Grade Descriptors will be used in academic assessment:

- Grade A Is very good or excellent in using basic principles and essential skills in practice. Requires very limited supervision. Is creative, work is virtually error free and writes well. Can apply learning in unfamiliar situations.
- Grade B Is good in using the basic principles and the essential skills in practice but requires some supervision.
- Grade C Is able to state most of the basic principles but is poor at using them, and the essential skills, in practice without direction.
- Grade D Marginal Pass and any Pass in a supplementary examination.
- Fail Does not know most of the basic principles and has not mastered the essential skills used in practice.
